Topic: The Status, Issues, and Countermeasures of Social Innovation Spaces in Shenzhen

In recent years, government support in the development of social organisations have led to an emergence of social innovation spaces across Shenzhen city. These spaces are run by different organisations with various models, and facilitate communication between social organisations and capacity building by providing office spaces, encouraging incubation, supporting resource exchange and so on. This presentation introduces the current status, characteristics, functions, results, and impact of Shenzhen's social innovation spaces. It also analyses the issues currently faced in the operation of such spaces, and proposes countermeasures to further improve the result of their work.

饒錦興先生
